

Sajeer F M

AI Engineer & Software Developer

Tamil Nadu, India | 6238610619 | sajeerfm93@gmail.com | linkedin.com/in/sajeerfm | github.com/sajeerrr

SUMMARY

AI Engineer and Software Developer with hands-on experience building production-ready AI applications using RAG, LLMs, and modern backend frameworks. Proficient in Python, FastAPI, and LangChain, with a strong track record of delivering end-to-end projects spanning semantic search, and full-stack web development.

EDUCATION

TKM College Of Engineering

Master of Computer Applications

Kollam, Kerala

Aug. 2025 – Present

University of Kerala

Bachelor of Science in Computer Science

Trivandrum, Kerala

Aug. 2021 – May 2024

PROJECTS

StudyMate - AI-Powered Learning Assistant | [GitHub](#)

FastAPI, LangChain, Streamlit, ChromaDB, PostgreSQL, Groq LLM

Jun 2026 – Present

- Built a **RAG-based learning platform** that processes and indexes **50+ page PDF documents**, enabling accurate question answering with **under 5-second** average response time
- Implemented **semantic search** with Sentence Transformers and ChromaDB, achieving **90%+ retrieval relevance** across a vector store of **10,000+ embedded chunks**
- Trained **ML classification models** (TF-IDF + Logistic Regression) for topic and difficulty prediction, reaching **87% accuracy** on a labeled dataset of **500+ questions**
- Automated quiz generation pipeline producing **10 contextual questions per document** with AI-driven evaluation and personalized learning recommendations
- Designed **8+ RESTful API endpoints** with FastAPI, backed by PostgreSQL storing **100+ user sessions** with activity logs and quiz history

HireX - AI-Powered Service Booking Platform | [GitHub](#)

PHP, FastAPI, MySQL, PaddleOCR, DeepFace, LangChain, Groq LLM

Jan 2026 – Mar 2026

- Developed a **multi-role service booking platform** supporting administrators, contractors, and customers with **15+ core features**, including booking, search, profile management, and service reviews.
- Built an **AI-powered worker verification microservice** using FastAPI that extracts structured information from government-issued IDs through **PaddleOCR** and **LangChain + Groq LLM**.
- Implemented **face verification** using DeepFace (ArcFace + RetinaFace) to compare ID photographs with live selfies, achieving **96%+ identity matching accuracy**.
- Designed a **trust scoring system** by combining OCR validation, facial verification, and document quality analysis to assist administrators in approving verified workers.

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, JavaScript, HTML/CSS

AI/ML: LangChain, RAG, LLMs, Sentence Transformers, Vector Embedding

Frameworks: FastAPI, Django, Streamlit, SQLAlchemy

Databases: MySQL, PostgreSQL, ChromaDB, SQLite

Developer Tools: Git, GitHub, GitHub Actions, Docker, AWS, Postman

CERTIFICATIONS

Python Developer (Google) | Data Science (Cisco) | Web Development (freeCodeCamp) | Generative AI (IBM)
